HP-styled Bootstrap

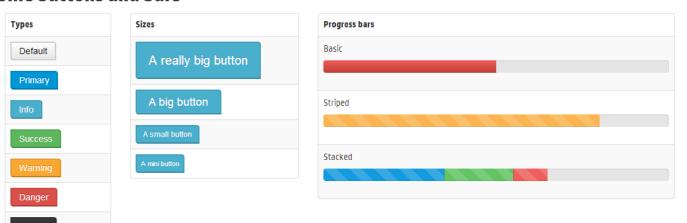

What is Bootstrap?

- Open-source Javascript framework from Twitter
- Combination of HTML, CSS and Javascript that makes web development easier and faster.

Purpose of HP-styled Bootstrap...

 This Bootstrap extension can be applied to any Bootstrap page and will style the page to HP standards.

AGILITY FOR MOBILITY

SLAM's goal is to implement a global integrated solution that links customer service level performance to account contractual commitments, and provides executive level visibility.

Mike O'Brien (Product Owner)

Features: Autocomplete Scottplacerdome Features: Autocomplete Search har

The SLA Tool ...provides

the customer with reports

that are **clear and**

easy to understand ...

This tool could be used as

a market

differentiator when

selling against the

competition.

Manager

- search bar
 A quick summary of your clients' performance
 A detailed vie
 - A detailed view of individual SLA's and their trending data

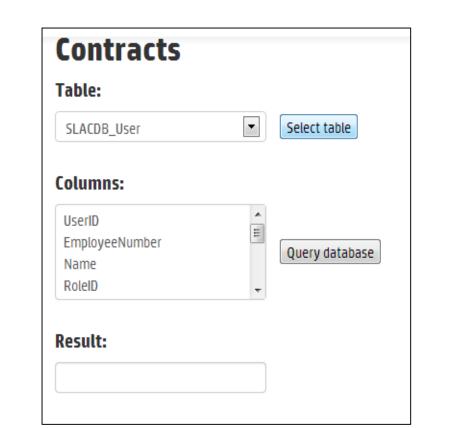

What's next?

- SLAMobile will be included along with the web version in the next release of SLAM.
- allow account managers to access client data on-the-go
- kick start HP's mobility movement to bring current applications onto mobile platforms.

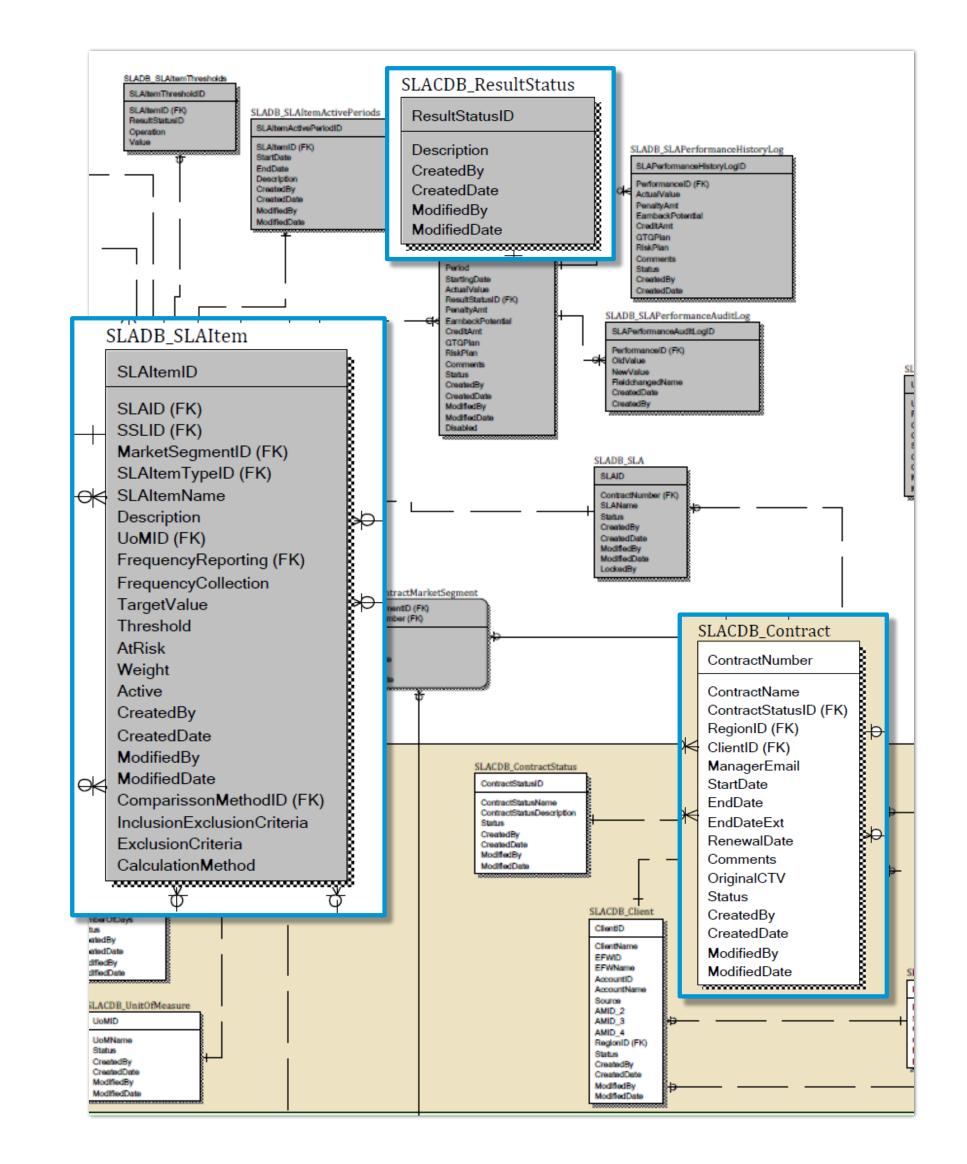

SLAM Web services

Our web services expose data from the database to the UI in an effective and secure fashion
